

Fix My Casablanca Fan

Information About Your Casablanca Fan

What direction should my fan go for Summer or Winter?

Summer: Forward (Counter Clockwise) - Winter: Reverse (Clockwise)

Where do I find the model and serial number?

Starting year 2010 most Model/Serial numbers were being put on the top of the fan body. Prior to that they were located on the motors.

What size fan should I buy?

A fan that is too big for your room may look awkward. A fan that is too small probably will not move enough air. Blade span is key. Here are some basic recommendations:

- For rooms up to 225 square feet (15' x 15') and larger, use a fan with a blade span of 50", 54", or 56".
- In rooms up to 144 square feet (12' x 12') we recommend fans with a blade span of 42" or 44".
- Smaller rooms up to 64 square feet (8' x 8') should use a fan with a 32" blade span.
